INTERNSHIPS

Software Bucket | 1 Month(s)

- It was a one month work from home internship and I had a nice working experience with them. I got a chance to apply the knowledge practically which I have learnt till now. I grabbed some new techniques and approach to solve problems until it ended up.

PROJECTS

Personal CV website | 7 Day(s)

- This is my personal CV website which I made to practice my HTML and CSS skills.
In some sections Bootstrap is also applied.

arkcode.studio

Blog Website | 2 Week(s)

- It is a blog website where a user can register and start blogging to share their ideas and views with the rest of the world.
For Frontend I have used blog theme by Start Bootstrap as referenced in the website also.
And for Backend I have used Python Flask with sqllite3 for while developing.
Currently the web app is hosted on Heroku with Postgresql as Database.

Learning Management System | 1 Month(s)

- A Learning Management System website where students and teachers can experience various services. Students can get information regarding their attendance, assignments, classes, etc. similarly Teachers too.
It is a part of my Minor Project which I have been developing with my college mates and is currently in development phase.
